tube and easy plug-in installation.

Pressurized SWHs
Working pressure 6 bar,
Max resistance 12 bar.
Reliable and efficient
twin-glass solar tubes.
No water through the

Inter Copper Coil

The low pressure system with copper coil inside, three point:

1. Copper coil with the triangle bracket fix inside tank.
2. Skilled design to insure the coil would not contact any part of the tank to avoid corroison of metal.
3. Structural stability, better security and more excellent than the same products abroad.
